Albion Oak

Albion Oak have over 30 years experience in the construction industry and in design and manufacture of Oak Framed Buildings.

Craftsmanship

We are passionate about the quality of product we offer. We strive to produce superior craftsmanship which is evident in the finished product, and its superb attention to detail. We ensure the highest standard of our entire process of oak framed buildings right through to the surface finish. We strongly believe that high standards and quality is paramount to our continued reputation as the very best in providing bespoke oak framed buildings.

Setting the Standard

We have vast experience in providing quality oak products to a variety of customers on an international level. Our bespoke oak framed buildings are beautifully hand made with superb attention to detail. We specialize in many different projects from single beams to full oak framed buildings, proud to offer exemplary service through offering unique designs and styles. We strive to deliver exemplary service, as well as ensuring our design service exceeds expectations by using the very best in technology and quality timber. We can deal with all aspects of the process, from design and conceptual inspiration through to completion.

Our dedicated team are on hand at all times to deal with any queries and provide guidance throughout the entire process. Whether you are looking for a single garage or have your own architect in place with existing designs and planning, we can help create 3D sketches of concept ideas to help you visualize the project. As well as this, we can also provide the very best design whilst sticking to your budget without compromising on style, appearance or quality.

You can be sure to receive a superb service from start to finish, as we are passionate about the product and service we provide

ABOUT US

Our Range of Standard Buildings

We have a range of standard off the shelf designs ready with all sales, planning, frame & assembly drawings.

Bespoke sales drawings can be provided at very short notice with frame and construction drawings supplied when ordered. All our frames are pre-assembled in our workshops with all joints being cut and perfectly fitted ready for assembly by you on site. We pay close attention to detail to ensure that everything is just right. Whether it's a garage, home office or garden building, you can be sure that it will fit together with ease.

Oak Frame Buildings - ready to assemble - No cutting on site. Traditional style English timber frame garage kits manufactured in Oak at very competitive prices. Our range of garages and outbuildings have been designed with the self builder, in mind. Based on traditional mortice & tenon jointed architecture and with an unlimited choice of designs to choose from.

We can supply open car ports, secure garages, workshops, logstores, poolside buildings along with garden rooms, conservatories and orangeries. The main posts, eaves beams, tie beams, soleplates and curved braces are manufactured from green oak with studwork and rafters being of softwood. The frame is clad with Protim treated featheredge weatherboard ex200 x 38mm; independent posts are located on staddle stones which are included with the kit.

Bespoke Garden Room

Bespoke Guest Accommodation

Bespoke Garage Complex

Single storey garages come in a range for four standard depths - 5m, 5.6m, 5.9m and 6.5m with a variety of combinations. Open bays, oak garage doors, weatherboarding with windows and personnel doors or any mix. You can add a logstore to either side or indeed both. A range of different frame sections can give a variety of different garage buildings from single bay garages through to multi complex structures.

Our Range of Standard Buildings

A wide variety of designs and spans can be achieved by using standard sections with additional aisles and catslide roofs

Design Service

We provide a free design service to ensure your oak frame can be manufactured in the most cost effective way.

Bespoke Garages

Why Choose an Oak Frame?

- **Timeless Aesthetic Heritage:** Masterfully combines centuries-old traditional carpentry techniques with modern architectural design to create a striking visual centerpiece.
- **Natural Character & Evolution:** Each premium green oak beam features unique grain patterns, deep tones and natural weathering that gracefully develops rich character over time.
- **Biophilic Living:** Introduces the warmth, texture and calming presence of natural exposed timber directly into your living or working environment.

Traditional Orangeries

Otherwise known as flat roof orangeries - Insulated with or without a glass roof lantern

Engineering & Construction Excellence

- **Precision Craftsmanship:** Every frame is meticulously dry-fitted by expert carpenters in our workshops to ensure flawless on-site assembly and structural perfection.
- **Generational Durability:** Built using traditional mortise and tenon joints secured with handmade oak pegs, creating a structure engineered to last for centuries.
- **Uncompromised Structural Strength:** Oak naturally hardens and grows stronger with age, offering superior structural resilience, natural fire resistance and exceptional load-bearing performance.

Sustainability & Performance

- **Eco-Conscious & Sustainable:** Sourced exclusively from sustainably managed, PEFC or FSC-certified woodlands where timber is consistently replanted.
- **A Carbon-Negative Choice:** Oak naturally traps and stores carbon dioxide for the lifetime of the building, significantly reducing your project's overall environmental footprint.
- **Modern Thermal Efficiency:** Seamlessly integrates with advanced, high-performance encapsulation systems to deliver exceptional insulation values and lower energy costs.

Design

Many stand alone buildings can be built without the need for planning permission. A studio or home office can be designed perfectly to suit your space and location, from a single open-plan room design to a building with multiple rooms, many styles can be achieved under 4m in height allowing in many cases to be built under permitted development, giving you an investment not only in your property but also in your own health & welfare.

Our Range of Standard Buildings

Stand Alone Buildings

Whether it be a small office to work from home or a large open space to accommodate a number of people, we can design something to suit your needs. Most offices can be designed to be under 4m in height and we have a range of standard sizes to make your project as cost effective as it can be

First Floor Offices

Offices above garages are often looked on favourably by planners particularly if accessed by an external oak staircase.

Oak Joinery as standard

Design Ideas

We have 40 years of architectural design experience. The entire frame is designed using advanced 3D CAD software. This ensures every mortise, tenon and joint is mathematically precise before a single piece of wood is cut.

Garden Buildings

As remote and flexible working remains a staple of modern life, a detached oak garden building offers the ultimate private workspace.

Versatility & Customisation

- **Tailored Architectural Freedom:** Completely bespoke designs customised to your exact lifestyle requirements, from sweeping vaulted ceilings to expansive glass walls.
- **Multi-Functional Spaces:** Perfectly suited for a diverse range of projects including luxury residential homes, garden rooms, traditional barns, multi-car garages and commercial extensions.
- **Open-Plan Flexibility:** The incredible structural strength of an oak frame eliminates the need for restrictive internal load-bearing walls, allowing for bright, fluid and expansive open-plan interiors.

Garden Buildings

Insulated buildings that can be used all year round. Visually and physically separating your professional life from your living space.

Studios & Home Offices

- **Work-Life Separation:** Visually and physically separates your professional life from your living space.
- **Biophilic Design:** Large, floor-to-ceiling glass expanses set between heavy oak posts offer panoramic views of the garden, reducing stress and boosting productivity.
- **Year-Round Comfort:** Easily insulated to modern building standards to stay warm in the winter and cool in the summer.

Ancillary

© Albion Oak Ltd

Outbuildings for Leisure & Hospitality

Ancillary buildings are increasingly being used to create dedicated spaces for relaxation, hobbies and entertaining guests.

Equestrian, Commercial & Agricultural Structures

- **Work-Life Balance:** For rural properties, oak offers unmatched durability and traditional aesthetics for managing land and animals.
- **Stables & Tack Rooms:** Oak is naturally resilient, highly robust against animal wear-and-tear and offers excellent natural ventilation.
- **Complex Barns & Machinery Stores:** Large-span oak trusses allow for vast, open interior spaces without the need for frequent internal support pillars, making it easy to store tractors, boats, or classic car collections.

House Design

New Dwellings

The ultimate realisation of traditional craftsmanship meeting modern architectural engineering. Unlike historic timber cottages that can sometimes feel dark or cramped, modern oak dwellings are characterised by soaring vaulted ceilings, expansive walls of glass and vast, open-plan layouts.
